# Kingsley Ebuka Ihekwaba

**Mobile Engineer · Flutter · Kotlin · Swift**

Markham, ON · Remote-friendly · kingsleyihekwaba208@gmail.com

## SUMMARY

Mobile engineer with 5+ years shipping production apps end to end. Flutter for speed across platforms, Kotlin and Swift when native depth matters, plus Clean Architecture that stays stable once real users show up. Strong on the hard parts after code review: crashes under live traffic, payments, auth, realtime systems, and App Store / Play release readiness.

## SKILLS

| | |
|---|---|
| **Languages** | Dart, Kotlin, Swift, Java, C#, JavaScript, SQL |
| **Mobile** | Flutter, Clean Architecture, Bloc, Provider, Riverpod, GetIt / injectable, Dio / Retrofit |
| **Platform** | Firebase Auth & FCM, Socket.IO, Google Maps / Places, Paystack, Supabase, secure storage, biometrics, deep linking |
| **Practice** | iOS & Android release pipelines, isolate-backed performance work, unit / widget / integration testing, production crash triage |
| **Tools** | VS Code, IntelliJ, Cursor, Claude |

## EXPERIENCE

### Mobile Engineer

Jan 2026 – Present

**Eastside Global Creations · Toronto, Canada**

- Building Mefarai, a dual-role fashion/tailoring marketplace (Customer + Designer), covering shared auth, onboarding, discovery, measurements, chat, orders, and business setup.
- Clean Architecture with get_it/injectable, Provider, and Dio/Retrofit against a production REST API, including token refresh on auth failures.
- End-to-end auth and session security: register/login, email & phone OTP, password reset, and flutter_secure_storage for tokens.
- Location and profile infrastructure: Google Maps picker, Places autocomplete, geocoding, multipart image uploads, and profile CRUD.
- Established a unit, widget, and integration test pyramid with mocktail and fake repositories across auth, onboarding, profile, and location flows.

### Lead Mobile Engineer

Nov 2022 – Oct 2024

**Nugi Technologies · Calabar, Nigeria**

- Shipped and scaled My Cross River, a civic super-app, from concept to 5K+ downloads on Google Play and the App Store with Flutter, Clean Architecture, and Bloc.
- Built realtime Socket.IO features for Queek: live chat, typing indicators, and booking/dispute workflows under concurrent-user edge cases.
- Diagnosed a production UI freeze from unoptimized base64 image handling, then offloaded JSON parsing to a background isolate with compute() to restore smooth scrolling.
- Integrated Firebase Auth, FCM (iOS APNs + Android), Supabase, Paystack, and Google Sign-In, including APNs token-timing and Google Sign-In v7 migration issues.

- Architected Stela, an AI storytelling app, with on-device TTS and word-level sync; owned iOS release stability after OS and toolchain upgrades.

### Flutter Engineer
Feb 2022 – Oct 2022

**Devpitch · Remote**

- Built and shipped Tailorte, a global fashion marketplace for creators, tailors, and fashion lovers — business tools for sellers, discovery and custom styles for buyers. 1K+ downloads on Google Play.
- Delivered business tooling in the same codebase: storefronts, portfolios, CRM, order lifecycle, staff roles, Paystack payments, and subscription plans.
- Feature-first Clean Architecture with get_it/injectable; Provider and Riverpod for state across customer and business surfaces.
- REST via Dio plus Socket.IO for chat; maps & geolocation for discovery; Firebase Messaging, secure storage, biometrics, PDF docs, and deep linking on iOS and Android.

## SELECTED PROJECTS

**My Cross River** · **Flutter · Bloc · Firebase**

Civic super-app for Cross River State: bills, tax, i-Report, and Digital ID. Led Flutter delivery end to end and shipped to 5K+ downloads on Google Play and the App Store.

**Tailorte** · **Flutter · Socket.IO · Paystack**

Global fashion marketplace connecting creators, tailors, and fashion lovers — sellers manage businesses and showcase products; buyers discover trends and create custom styles. 1K+ downloads on Google Play.

**SurePlug** · **Flutter · Maps · Payments**

Two-sided services marketplace: nearby discovery, slot booking, realtime messaging, order lifecycle, payments verification, disputes, and push notifications.

**Stela** · **Flutter · Provider · TTS**

AI storytelling app with Clean Architecture and on-device TTS with word-level highlight sync for interactive listening.

**Bosscab Agent · Crowdvise · AirWiFi** · **Flutter**

Additional shipped work spanning driver onboarding under a tight deadline, AI idea-validation flows, and an ISP customer portal with resilient loading states and a tighter design system.

## EDUCATION

### Software Engineering Technician
Expected Winter 2027

**Centennial College · Toronto, Canada**

Coursework: C# (OOP, generics, delegates, LINQ), SQL/Oracle database design, JavaScript/web fundamentals, UML system & class design.
